If there is any conflict between, or any difference in the interpretation of the English and Chinese language independent auditors' report and financial statements, the Chinese version shall prevail.

Table of contents

Independent Auditors' Report

To the Board of Directors of Yeh Chiang Technology Corporation:

Opinion

We have audited the financial statements of Yeh Chiang Technology Corporation ("the Company"), which comprise the balance sheet as of December 31, 2020 and 2019, and the statement of comprehensive income, changes in equity and cash flows for the years then ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audit in accordance with the Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Evaluation of inventory allowance (including the inventory that was recorded in investments accounted for using the equity method)

For the evaluation of inventory policy please refer to Note 4(7) Summary of Significant Accounting Policies - Inventories, Notes 5 Major Sources of Accounting Judgments, Estimations and Assumptions of Uncertainty, and Note 6(4) description of Significant Accounts - Inventories to the financial statements.

Description of key audit matter:

In financial reports, inventories are measured at the lower of cost and net realizable value. Therefore, the Company needs to use judgment and estimation to decide on the net realizable value of the inventory on the reporting date. Due to the rapid changes in technology, the launch of new products and the new technologies may cause a significant change in the market, and sales of related products may fluctuate significantly, resulting in inventory costs exceeding its net realizable value. In addition, the policy for the allowance for loss of inventories is based on past experience and the management's estimate of the future. As a result of these subjective judgments and estimates on inventory allowance for loss of value is one of the key matters in our audit.

How the matter was addressed in our audit:

Our principal audit procedures included evaluating the method of providing allowance for inventory valuation and the reasonable information, assumptions and formulas on which it is based; and examining the appropriate supporting documents to assess the appropriateness of the inventory allowance; examining the inventory aging report to analyze the change of inventory aging reports; performing the sample procedures to check the correctness of the inventory aging reports; evaluate whether the evaluation of inventory is consistent with its evaluation policy; performing a retrospective testing to verify the rationality of the provision of obsolescence.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company’ s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including the supervisors) are responsible for overseeing the Company’ s financial reporting process.

Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’ s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. Obtain sufficient appropriate audit evidence regarding the financial information of the investment in other entities accounted for using the equity method to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Chien-Hui Lu and Chun-Yuan Wu.

Yeh Chiang Technology Corporation

Notes to the Financial Statements

For the years ended December 31, 2020 and 2019

(Expressed in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

1. Company history

Yeh Chiang Technology Corporation (the "Company") was incorporated in December 23, 1994 and commenced its business operation in December 1995. The registered address of the Company's office is 7th Floor, No.13, No.19, Sanchong Road, Nangang District, Taipei. The Company's ordinary shares were publicly listed on the Taiwan Exchange in March 2002.

The major business activities of the Company are the production and sales of high-tech heat pipe components, and solder balls.

2. Approval date and procedures of the financial statements:

These financial statements were authorized for issue by the Board of Directors on March 16, 2021.

3. New standards, amendments and interpretations adopted:

(1) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. ("FSC") which have already been adopted.

The Company has initially adopted the following new amendments, which do not have a significant impact on its financial statements, from January 1, 2020:

- Amendments to IFRS 3 "Definition of a Business"
- Amendments to IFRS 9, IAS39 and IFRS7 "Interest Rate Benchmark Reform"
- Amendments to IAS 1 and IAS 8 "Definition of Material"
- Amendments to IFRS 16 "COVID-19-Related Rent Concessions"

(2) The impact of IFRS issued by the FSC but not yet effective

The Company assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2021, would not have a significant impact on its company financial statements:

- Amendments to IFRS 4 "Extension of the Temporary Exemption from Applying IFRS 9"
- Amendments to IFRS 9, IAS39, IFRS7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform－Phase 2"

(3) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The Company does not expect the following other new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its company financial statements:

- Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
- IFRS 17 "Insurance Contracts" and amendments to IFRS 17 "Insurance Contracts"
- Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"
- Amendments to IAS 16 "Property, Plant and Equipment－Proceeds before Intended Use"
- Amendments to IAS 37 "Onerous Contracts－Cost of Fulfilling a Contract"
- Annual Improvements to IFRS Standards 2018-2020
- Amendments to IFRS 3 "Reference to the Conceptual Framework"
- Amendments to IAS 1 "Disclosure of Accounting Policies"
- Amendments to IAS 8 "Definition of Accounting Estimates"

4. Summary of significant accounting policies:

The significant accounting policies presented in the parent-company-only financial statements are summarized below. Except for those specifically indicated, the following accounting policies were applied consistently throughout the periods presented in the parent-company-only financial statements.

(1) Statement of compliance

The parent-company-only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

(2) Basis of preparation

A. Basis of measurement

Except for the following significant accounts, the parent-company-only financial statements have been prepared on a historical cost basis:

(a) Financial instruments at fair value through profit or loss are measured at fair value;

(b) Financial assets at fair value through other comprehensive income are measured at fair value;

(c) The defined benefit assets are measured at fair value of the plan assets less the present value of the defined benefit obligation.

B. Functional and presentation currency

The functional currency of each the Company entity is determined based on the primary economic environment in which the entity operates. The financial statements are presented in New Taiwan dollars, which is the Company's functional currency. All financial information presented in New Taiwan dollars has been rounded to the nearest thousand.

(3) Foreign currencies

A. Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies at the exchange rates at the dates of the transactions. At the end of each subsequent reporting period, monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at that date.

Non-monetary items denominated in foreign currencies that are measured at fair value are translated into the functional currencies using the exchange rate at the date that the fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

B. Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into the presentation currency at the exchange rates at the reporting date. The income and expenses of foreign operations, are translated into the presentation currency at the average exchange rate. Exchange differences are recognized in other comprehensive income.

When a foreign operation is disposed of such that control, significant influence, or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When the Company disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interests.

(4) Classification of current and non-current assets and liabilities

An asset is classified as current under one of the following criteria, and all other assets are classified as non-current.

A. It is expected to be realized, or intended to be sold or consumed, in the normal operating cycle;

B. It is held primarily for the purpose of trading;

C. It is expected to be realized within twelve months after the reporting period; or

D. The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current under one of the following criteria, and all other liabilities are classified as non-current.

An entity shall classify a liability as current when:

A. It is expected to be settled in the normal operating cycle;

B. It is held primarily for the purpose of trading;

C. It is due to be settled within twelve months after the reporting period; or

D. The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by issuing equity instruments do not affect its classification.

(5) Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Time deposits which meet the above definition and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes should be recognized as cash equivalents.

(6) Financial instruments

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

A. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

On initial recognition, a financial asset is classified as measured at: amortized cost; Fair value through other comprehensive income (FVOCI) - equity investment; or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

(a) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

(b) Fair value through other comprehensive income (FVOCI)

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an instrument-by-instrument basis.

Dividend income derived from equity investments is recognized on the date that the Company's right to receive payment is established, which in the case of quoted securities is normally the ex-dividend date.

(c) Fair value through profit or loss (FVTPL)

All financial assets not classified as amortized cost or FVOCI described as above are measured at FVTPL, including derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset, which meets the requirements to be measured at amortized cost or at FVOCI, as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest, are recognized in profit or loss.

(d) Impairment of financial assets

The Company recognizes loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, notes and trade receivables, guarantee deposit paid and other financial assets).

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following which are measured as 12-month ECL:

- debt securities that are determined to have low credit risk at the reporting date；and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables and contract assets are always measured at an amount equal to lifetime ECL.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial instrument.

12-month ECL are the portion of ECL that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECL is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Company's historical experience and informed credit assessment as well as forward-looking information.

The Company considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of investment grade which is considered to be BBB- or higher per Standard & Poor's, Baa3 or higher per Moody's or twA or higher per Taiwan Ratings'.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 180 days past due.

The Company considers a financial asset to be in default when the financial asset is more than 365 days past due or the debtor is unlikely to pay its credit obligations to the Company in full.

ECL are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive). ECL are discounted at the effective interest rate of the financial asset.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

(e) Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

B. Financial liabilities and equity instruments

(a) Classification of debt or equity

Debt and equity instruments issued by the Company are classified as financial liabilities or equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

(b) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

(c) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

(d) Derecognition of financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

(e) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

(7) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is calculated using the weighted average method, and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(8) Investments in subsidiaries

The Company' s subsidiaries are accounted for using the equity method when preparing their financial statements. Under the equity method, profit, other comprehensive income and equity in the financial statements are equivalent to those of the profit, other comprehensive income and equity which are contributed to the owners of the parent in the financial statements.

The changes in the parent' s interest in its subsidiaries that do not result in a loss of control are accounted as equity transactions.

(9) Property, plant and equipment

A. Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

B. Subsequent cost

Subsequent expenditure is capitalized only when it is probable that future economic benefits associated with the expenditure will flow to the Company.

C. Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

The estimated useful lives for the current and comparative years of property, plant and equipment are as follows:

(a) Buildings 15~25 years

(b) Machinery and equipment 8 years

(c) Miscellaneous equipment 2~6 years

The depreciation methods, useful lives, and residual values are reviewed at each reporting date and adjusted if appropriate.

(10) Lease

A. Identifying a lease

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

(a) the contract involves the use of an identified asset - this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified; and

(b) the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and

(c) the Company has the right to direct the use of the asset throughout the period of use only if either:

- the Company has the right to direct how and for what purpose the asset is used throughout the period of use; or

- the relevant decisions about how and for what purpose the asset is used are predetermined and:

  - the Company has the right to operate the asset throughout the period of use, without the supplier having the right to change those operating instructions; or

  - the Company designed the asset in a way that predetermines how and for what purpose it will be used throughout the period of use.

B. As a lessee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

(a) fixed payments, including in-substance fixed payments;

(b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;

(c) amounts expected to be payable under a residual value guarantee; and

(d) payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

(a) there is a change in future lease payments arising from the change in an index or rate; or

(b) there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee; or

(c) there is a change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset, or

(d) there is a change of its assessment on whether it will exercise a extension or termination option; or

(e) there is any lease modifications

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Company accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Company presents right-of-use assets that do not meet the definition of investment and lease liabilities as a separate line item respectively in the statement of financial position.

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases of corporate fleet vehicle and staff dormitory that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(11) Intangible assets

A. Recognition and measurement

Expenditure on research activities is recognized in profit or loss as incurred.

Development expenditure is capitalized only if the expenditure can be measured reliably, the product or process is technically, and commercially feasible, future economic benefits are probable and the Company intends to, and has sufficient resources to, complete development and to use or sell the asset. Otherwise, it is recognized in profit or loss as incurred. Subsequent to initial recognition, development expenditure is measured at cost, less accumulated amortization and any accumulated impairment losses.

Other intangible assets, including patents and trademarks, that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

B. Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognized in profit or loss as incurred.

C. Amortization

Amortization is calculated over the cost of the asset, less its residual value, and is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use.

The estimated useful lives for the current and comparative years of patents and trademarks are 10 to 23 years.

Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(12) Impairment of non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset’s recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount. Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset’s carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(13) Revenue from contracts with customers

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Company's main types of revenue are explained below.

A. Sale of goods-electronic components

The Company manufactures and sells high-tech heat pipe components and solder balls. The Company recognizes revenue when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Company has objective evidence that all criteria for acceptance have been satisfied.

A receivable is recognized when the goods are delivered as this is the point in time that the Company has a right to an amount of consideration that is unconditional.

B. Financing components

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Company does not adjust any of the transaction prices for the time value of money.

(14) Employee benefits

A. Defined contribution plans

Obligations for contributions to defined contribution pension plans are expensed as the related service is provided.

B. Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated separately for each the plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

C. Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided.

A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(15) Income taxes

Income taxes comprise include both current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes are recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases.

Deferred taxes are recognized except for the following:

A. temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits (losses) at the time of the transaction;

B. temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and

C. taxable temporary differences arising on the initial recognition of goodwill.

Deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reserve, using the tax rates that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if the following criteria are met:

A. the Company has a legally enforceable right to set off current tax assets against current tax liabilities ; and

B. the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:

   (a) the same taxable entity; or

   (b) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Deferred tax assets are recognized for the carry forward of unused tax losses, and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized; such reductions are reversed when the probability of future taxable profits improves.

(16) Earnings per share

The Company discloses the Company's basic and diluted earnings per share attributable to ordinary shareholders of the Company. Basic earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding. Diluted earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding after adjustment for the effects of all potentially dilutive ordinary shares, such as employee remuneration through the issuance of shares.

(17) Operating segments

The Company has disclosed operating segment information in consolidated financial statements. Hence, this information is not required to be disclosed in these parent-company-only financial statements.

5. Significant accounting assumptions and judgments, and major sources of estimation uncertainty:

The preparation of the financial statements in conformity with the Regulations requires management to make judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

The management continues to monitor the accounting estimates and assumptions. The management recognizes any changes in accounting estimates during the period and the impact of those changes in accounting estimates in the following period.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is as follows:

Evaluation of inventory allowance (include the inventory that recorded in investments accounted for using the equity method.)

As inventories are stated at the lower of cost or net realizable value, the Company estimates the net realizable value of inventories for obsolescence and unmarketable items at the end of the reporting period and then writes down the cost of inventories to net realizable value. The net realizable value of the inventory is mainly determined based on assumptions as to future demand within a specific time horizon. Due to the rapid industrial transformation, there may be significant changes in the net realizable value of inventories. Refer to note 6(4) for further description of the valuation of inventories.

6. Explanation of significant accounts:

(1) Cash and cash equivalents

		December 31, 2020	December 31, 2019
Petty cash and cash on hand	$	12	3
Check and demand deposits		108,622	18,677
Foreign exchange deposit		164,486	91,880
	$	**273,120**	**110,560**

Please refer to note 6(18) for the credit risk of the financial assets and liabilities of the Company.

(2) Financial instruments

A. Current financial assets at fair value through profit or loss

		December 31, 2020	December 31, 2019
Beneficiary Certificates - mutual Funds	**$**	**108,682**	**153,464**

The gains arising from the fair value assessment of the financial assets of the Company in 2020 and 2019 were $580 thousand and $1,288 thousand.

B. Non-Current financial assets at fair value through other comprehensive income:

		December 31, 2020	December 31, 2019
Listed stocks - ASUSTeK Computer Inc.	$	33,247	30,725
Listed stocks - Pegatron Corporation		19,706	20,028
Emerging Stock – Powerchip Semiconductor Manufacturing Corporation		23,289	-
Domestic non-listed (cabinet) stocks - Song Long Electronics Co., Ltd.		2,500	13,214
Domestic non-listed (cabinet) stock - Powerchip Technology Corporation		2,858	17,181
	$	**81,600**	**81,148**

In 2020, Powerchip Technology Corporation will reduce its capital and return the share price with property other than cash, wherein the Company will obtain 466 thousand shares of Powerchip Semiconductor Manufacturing Corporation.

The Company investments in these equity instruments are not held for trading purposes and have been designated for non-current financial assets at fair value through other comprehensive income.

(3) Notes and trade receivables, net

	December 31, 2020	December 31, 2019
Note receivables	$ -	1,303
Trade receivables - measured as amortized cost	304,575	285,120
Less: Loss allowance	-	(4,143)
	$ 304,575	282,280

The Company applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward looking information, including macroeconomic and relevant industry information. The loss allowance provision as of December 31, 2020 and 2019 were determined as follows:

	December 31, 2020		
	Gross carrying amount	Weighted-average loss rate	Loss allowance provision
Not past due	$ 304,575	0%	-

	December 31, 2019		
	Gross carrying amount	Weighted-average loss rate	Loss allowance provision
Not past due	$ 282,280	0%	-

The movement in the allowance for notes and trade receivables were as follows:

	December 31, 2020	December 31, 2019
Balance at January 1	$ (4,143)	(5,126)
Impairment losses reversed	4,143	983
Balance at December 31	$ -	(4,143)

(4) Inventories

	December 31, 2020	December 31, 2019
Trading inventories	$ 1,673	2,734

In 2020 and 2019 the Comapny recognized cost of sales amounting to $802,137 thousand and $760,801 thousand, respectively; the reversal of write-downs amounting to $1,267 thousand and $0 thousand, respectively. The reversals are included in cost of sales.

As of, 2020 and 2019, the Company did not provide any inventories as collateral for its loans.

(5) Investments accounted for using the equity method

A. The Company's financial information for investments accounted for using the equity method at the reporting date is as follows:

	December 31, 2020	December 31, 2019
Subsidiaries	$ 2,143,017	1,797,829

For the year ended December 31, 2020 and 2019, recognized share of profit of subsidiaries accounted to $264,166 thousand and $199,802 thousand.

B. Subsidiaries

Please refer to the 2020 consolidated financial report.

C. Collateral

As of December 31, 2020 and 2019, the Company did not provide any investments accounted for using the equity method as collaterals for its loans.

(6) Property, plant and equipment

The cost, depreciation, and impairment of the property, plant and equipment of the Company for the years ended December 31, 2020 and 2019, were as follows:

	Land	Buildings	Machinery and equipment	Other facilities	Total
Cost or deemed cost:					
Balance on January 1, 2020	$ 99,391	8,362	1,122	32,127	141,002
Additions	-	-	-	359	359
Balance on December 31, 2020	$ 99,391	8,362	1,122	32,486	141,361
Balance on January 1, 2019	$ 99,391	8,362	1,122	31,887	140,762
Additions	-	-	-	343	343
Disposal	-	-	-	(103)	(103)
Balance on December 31, 2019	$ 99,391	8,362	1,122	32,127	141,002
Depreciation and impairments loss:					
Balance on January 1, 2020	$ 4,673	8,243	904	31,223	45,043
Depreciation	-	119	125	243	487
Balance on December 31, 2020	$ 4,673	8,362	1,029	31,466	45,530
Balance on January 1, 2019	$ 4,673	7,954	779	31,189	44,595
Depreciation	-	289	125	137	551
Disposal	-	-	-	(103)	(103)
Balance on December 31, 2019	$ 4,673	8,243	904	31,223	45,043

		Land	Buildings	Machinery and equipment	Other facilities	Total
Carrying amounts:						
Balance on December 31, 2020	$	**94,718**	**-**	**93**	**1,020**	**95,831**
Balance on December 31, 2019	$	**94,718**	**119**	**218**	**904**	**95,959**
Balance on January 1, 2019	$	**94,718**	**408**	**343**	**698**	**96,167**

As of December 31, 2020 and 2019, the Company did not provide any property, plant and equipment as collateral for its loans.

(7) Intangible assets

The cost and amortization of the intangible assets of the Company for the years ended December 31, 2020 and 2019, were as follows:

		Patent and trademark
Costs:

A. Recognition of amortization

The amortization of intangible assets is included in the statement of comprehensive income under the operating expenses, please refer to note12(1).

B. As of December 31, 2020 and 2019, the Company did not provide any intangible assets as collateral for its loans.

(8) Bank loan

	December 31, 2020	December 31, 2019
Credit loan	$ 50,000	10
Unused short-term credit lines	$ 445,440	429,930
Range of interest rates	0.88%	1.54%

(9) Right-of-use assets

The Company leases buildings. Information about leases for which the Company as a lessee was presented below:

	Buildings
Cost:	
Balance at December 31, 2020 (Opening Balance)	$ 17,557
Balance at December 31, 2019 (Opening Balance)	$ 17,557
Accumulated depreciation:	
Balance at January 1, 2020	$ 4,389
Depreciation	4,389
Balance at December 31, 2020	$ 8,778
Balance at January 1, 2019	$ -
Depreciation	4,389
Balance at December 31, 2019	$ 4,389
Carrying amount:	
Balance at December 31, 2020	$ 8,779
Balance at December 31, 2019	$ 13,168
Balance at January 1, 2019	$ 17,557

(10) Lease liabilities

The carrying amount of lease liabilities of the Company is:

	December 31, 2020	December 31, 2019
Current	$ 4,420	4,357
Non-current	$ 4,485	8,905

For the maturity analysis, please refer to note 6(18).

The amounts recognized in profit or loss was as follows:

	2020	2019
Interest expense on lease liabilities	$ **159**	**219**
Expenses relating to short-term leases	$ **309**	**2,211**
Total cash outflow for leases	$ **4,825**	**6,725**

Real estate leases

As of December 31, 2020 and 2019, the Company leases buildings for its office space. The leases of office space typically run for a period of 2 to 4 years. Some leases include an option to renew the lease for an additional period of the same duration after the end of the contract term.

The Company has elected not to recognize right-of-use assets and lease liabilities for these leases which are short-term and leases of low-value items.

(11) Employee benefits

A. Defined benefit plans

Reconciliation of defined benefit obligation at present value and plan asset at fair value are as follows:

	December 31, 2020	December 31, 2019
Present value of the defined benefit obligations	$ (8,810)	(8,954)
Fair value of plan assets	13,970	13,428
Net defined benefit liabilities	$ **5,160**	**4,474**

The Company makes defined benefit plan contributions to the pension fund account with Bank of Taiwan that provides pensions for employees upon retirement. Plans (covered by the Labor Standards Law) entitle a retired employee to receive retirement benefits based on years of service and average monthly salary for the six months prior to retirement.

(a) Composition of plan assets

The Company allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, Ministry of Labor. With regard to the utilization of the funds, minimum earnings shall be no less than the earnings attainable from two-year time deposits with interest rates offered by local banks.

The Company's Bank of Taiwan labor pension reserve account balance amounted to $13,970 thousand as of December 31, 2020. For information on the utilization of the labor pension fund assets, including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labor.

(b) Movements in present value of the defined benefit obligations

The movement in present value of the defined benefit obligations for the Company were as follows:

		For the year ended December 31, 2020	For the year ended December 31, 2019
Defined benefit obligations at 1, January	$	8,954	8,665
Current service costs and interest cost		56	146
Remeasurements loss (gain):			
－financial assumptions		(200)	143
Defined benefit obligations at 31, December	**$**	**8,810**	**8,954**

(c) Movements of defined benefit plan assets

The movements in the present value of the defined benefit plan assets for the Company were as follows:

		For the year ended December 31, 2020	For the year ended December 31, 2019
Fair value of plan assets at 1, January	$	13,428	12,845
Interest income		84	113
Remeasurements gain (loss):			
－Return on plan assets excluding interest income		458	470
Fair value of plan assets at 31, December	**$**	**13,970**	**13,428**

(d) Expenses recognized in profit or loss

The expenses recognized in profit or loss for the Company were as follows:

		For the year ended December 31, 2020	For the year ended December 31, 2019
Current service costs	$	-	70
Net interest of net assets for defined benefit obligations		(28)	(37)
	$	**(28)**	**33**
Operating expense	**$**	**(28)**	**33**

(e) Actuarial assumptions

The principal actuarial assumptions at the reporting date were as follows:

	For the year ended December 31, 2020	For the year ended December 31, 2019
Discount rate	0.375 %	0.625 %
Future salary increase rate	2.00 %	2.00 %

The expected allocation payment to be made by the Company to the defined benefit plans for the one-year period after the reporting date is $245 thousand.

The weighted average lifetime of the defined benefits plans is 6.8 years.

(f) Sensitivity analysis

If the actuarial assumptions had changed, the impact on the present value of the defined benefit obligation shall be as follows:

	Influences of defined benefit obligations	
	Increased 0.25%	Decreased 0.25%
December 31, 2020		
Discount rate	$ (150)	153
Future salary increasing rate	148	(145)
December 31, 2019		
Discount rate	$ (169)	174
Future salary increasing rate	168	(165)

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown above. The method used in the sensitivity analysis is consistent with the calculation of pension liabilities in the balance sheets.

There is no change in the method and assumptions used in the preparation of sensitivity analysis in 2020 and 2019.

B. Defined contribution plans

The Company allocates 6% of each employee’s monthly wages to the labor pension personal account at the Bureau of Labor Insurance in accordance with the provisions of the Labor Pension Act. Under these defined contribution plans, the Company allocates a fixed amount to the Bureau of Labor Insurance without additional legal or constructive obligation.

The pension costs incurred from the contributions to the Bureau of the Labor Insurance amounted to $1,562 thousand and $1,818 thousand for the years ended December 31, 2020 and 2019, respectively.

(12) Income taxes

A. Income taxes expense (benefits)

The amount of income tax expense (benefits) was as follow:

	For the year ended December 31, 2020	For the year ended December 31, 2019
Current tax expense	$ 329	-
5% surtax on unappropriated retained earnings	8,479	474
Deferred tax expense	48,858	3,135
	$ 57,666	**3,609**

The amount of income tax benefits recognized in other comprehensive income in 2020 and 2019 was as follows:

	For the year ended December 31, 2020	For the year ended December 31, 2019
Exchange differences on currency translation of foreign operations	**$ 3,925**	**(9,142)**

Reconciliation of income tax expense and income before income tax in 2020 and 2019 is as follows:

	For the year ended December 31, 2020	For the year ended December 31, 2019
Income before income tax	$ 331,876	226,382
Income tax at the Company's domestic tax rate	66,375	45,276
Change in unrecognized temporary differences and others	(17,517)	(42,141)
Change in provision in prior periods	329	-
5% surtax on unappropriated retained earnings	8,479	474
	$ 57,666	**3,609**

B. Deferred tax assets and liabilities

(a) Unrecognized deferred tax assets

Deferred tax assets have not been recognized in respect of the following items:

	December 31, 2020	December 31, 2019
The carryforward of unused tax losses	$ 45,112	59,042

The R.O.C. Income Tax Act allows net losses, as assessed by the tax authorities, to offset taxable income over a period of ten years for local tax reporting purposes. Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the Company can utilize the benefits therefrom.

As at 31 December 2020, the information of the Company's unutilized business losses for which no deferred tax assets were recognized are as follows:

Year of loss	Unutilized business loss	Expiry date
2016 (Approved amount)	$ 80,520	2026
2017 (Approved amount)	134,748	2027
2018 (Approved amount)	10,293	2028
	$ 225,561	

(b) Recognized deferred tax assets and liabilities

Deferred Tax Assets	January 1, 2019	Recognized in profit or loss	Recognized in other comprehensive income	December 31, 2019	Recognized in profit or loss	Recognized in other comprehensive income	December 31, 2020
Inventory devaluation loss	$ 6,741	-	-	6,741	(253)	-	6,488
Foreign currency translation differences for foreign operations and other	15,597	3,783	9,142	28,522	(80)	(3,925)	24,517
	$ 22,338	3,783	9,142	35,263	(333)	(3,925)	31,005

Deferred Tax Liabilities	January 1, 2019	Recognized in profit or loss	Recognized in other comprehensive income	December 31, 2019	Recognized in profit or loss	Recognized in other comprehensive income	December 31, 2020
Equity method recognized the gain of foreign subsidiaries	$ 267	6,918	-	7,185	48,525	-	55,710

C. The Company's tax returns for the years through 2018 were assessed by the Tax Authorities.

(13) Capital and other equity

A. Common stock

As of 31 December 2020 and 2019, the number of authorized ordinary shares were $2,600,000 thousand shares with par value of $10 per share (both of them reserved $100,000 thousand for the issue of employee stock option certificates, and $200,000 thousand for the issuance of convertible corporate bonds). The actual paid-in capital is 1,824,799 thousand.

B. Capital surplus

	December 31, 2020	December 31, 2019
Additional paid-in capital	$ 787,281	787,281
Changes of equities on associates	13,492	13,492
Changes of equities on subsidiaries	6,560	6,560
Employee share options	23,887	23,887
	$ 831,220	**831,220**

According to the R.O.C. Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, capital increases by transferring capital surplus in excess of par value should not exceed 10% of the total common stock outstanding.

C. Retained earnings

The Company's article of incorporation stipulates that Company's net earnings should first be used to offset the prior years' deficits, if any, before paying any income taxes. Of the remaining balance, 10% is to be appropriated as legal reserve, and then any remaining profit together with any undistributed retained earnings shall be distributed according to the distribution plan proposed by the Board of Directors and submitted to the stockholders' meeting for approval.

The Company's dividend policy is determined in accordance with the Company law and the Company's articles of association, and is determined by the Company's capital and financial structure, operating conditions, surplus, the nature of the industry and the cyclical factors. The cash dividend is not less than 50% of the total dividends for the year, and can be adjusted according to the flexibility of internal and external environmental changes.

(a) Legal reserve

When a Company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

(b) Special reserve

By choosing to apply the exemptions granted under IFRS 1 during the Company's first-time adoption of IFRSs endorsed by the FSC, the accumulating conversion adjustments under shareholders' equity, transferred on the conversion date, resulted in an increase in retained earnings of $109,388 thousand. However, on the conversion date, the actuarial gains and losses will be recognized immediately. The retained earnings incurred from the retained surplus of $4,917 thousand, and the expected cost of the employee's accumulated paid leave, will be reduced by $1,771 thousand. The conversion date was based on the first time adoption of the IFRSs endorsed by the FSC. The net increase in retained earnings amounted to $102,700 thousand, which resulted in the loss of the original account $(90,258) thousand and the retained surplus of $12,422 thousand. According to the Ruling 1010012865 issued by the FSC on April 6, 2012, a net increase in retained earnings, due to the first-time adoption of the IFRSs endorsed by the FSC, shall be reclassified as a special reserve during earnings distribution, and when the relevant asset is use, disposed, or reclassified, this special reserve shall be reversed as distributable earnings proportionately. In the first half of the year 2016 and the second half of the year of 2015, the special surplus reserve amounted to $2,681 thousand and $4,206 thousand, respectively, due to the sales of Yeh Chiang Kunshan and the disposal of Yeh Chiang Dongguan. The carrying amount of special reserve both amounted to $5,555 thousand as of December 31, 2020 and 2019.

In accordance with the guidelines of the above Ruling, a portion of current-period earnings and undistributed prior-period earnings shall be reclassified as a special reserve during earnings distribution. The amount to be reclassified should be equal to the difference between the total net current-period reduction of special reserve resulting from the first-time adoption of the IFRSs endorsed by the FSC and the carrying amount of other shareholders' equity as stated above. Similarly, a portion of undistributed prior-period earnings shall be reclassified as a special reserve (which does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior-periods due to the first-time adoption of the IFRSs endorsed by the FSC. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

The Company did not distribute any dividends in 2020 and 2019, with the resolution approved during the shareholders' meeting held on the June 10, 2020 and June 19, 2019, respectively.

D. Other equity (net of tax)

		Exchange differences on translation of foreign financial statements	Unrealized gains (losses) from financial assets measured at fair value through other comprehensive income
Balance at January 1, 2020	$	(160,366)	16,741
Exchange differences on foreign operations		15,696	-

Balance at December 31, 2020	$	(144,670)	17,193
Balance at January 1, 2019	$	(123,796)	794
Exchanges differences on foreign operations		(36,570)	-
Unrealized gains (losses) from financial assets measured at fair value through other comprehensive income		-	15,947
Balance at December 31, 2019	$	(160,366)	16,741

(14) Earnings per share

The calculation of basic earnings per share and diluted earnings per share for the year ended December 31, 2020 and 2019 are as follows:

		For the year ended December 31, 2020	For the year ended December 31, 2019
Basic earnings per share:			
Net income / loss attributable to ordinary shareholders of the Company	$	274,210	222,773
Weighted-average number of ordinary shares (in thousands)		182,480	182,480
Basic earnings per share (TWD)	$	1.50	1.22

	For the year ended December 31, 2020	For the year ended December 31, 2019
Diluted earnings per share:		
Net income / loss attributable to ordinary shareholders of the Company	**$ 274,210**	**222,773**
Weighted-average number of ordinary shares (diluted) (in thousands)	182,480	182,480
Impact of dilution of potential common stock - employee compensation (thousand shares)	2,368	593
Weighted-average number of ordinary shares (in thousands)	**184,848**	**183,073**
Diluted earnings per share (TWD)	**$ 1.48**	**1.22**

(15) Revenue from contracts with customers

A. Details of revenue

	For the year ended December 31, 2020	For the year ended December 31, 2019
Primary geographical markets:		
China	$ 733,838	743,876
Singapore	177,410	36,202
Taiwan	60,146	99,019
Other	7,497	10,853
	$ 978,891	**889,950**
Major products:		
Heat pipe product	**$ 978,891**	**889,950**

B. Contract balance

For details on trade receivables and allowance for impairment, please refer to note 6(3).

(16) Employee compensation and directors' and supervisors' remuneration

In accordance with the articles of incorporation the Company should contribute no less than 10% of the profit as employee compensation and less than 2% as directors' and supervisors' remuneration when there is profit for the year. However, if the Company has accumulated deficits, the profit should be reserved to offset the deficit. The recipients of shares and cash may include the employees of the Company's affiliated companies who meet certain conditions.

For the years ended December 31, 2020 and 2019, the Company estimated its employee remuneration amounting to $37,713 thousand and $25,725 thousand, and directors' and supervisors' remuneration amounting to $7,543 thousand and $5,145 thousand. The estimated amounts mentioned above are calculated based on the net profit before tax, excluding the remuneration to employees, directors and supervisors of each period, multiplied by the percentage of remuneration to employees, directors and supervisors as specified in the Company's articles. These remunerations were expensed under operating expenses during 2020 and 2019. If there would be any changes after the reporting date, the changes shall be accounted for as changes in accounting estimates and recognized as profit or lost in the following year. If, however, the shareholders determine that the employee remuneration is to be distributed through stock dividends, the calculation, based on the shares, shall be calculated using the stock price on the day before the shareholders' meeting. The related information can be accessed from the Market Observation Post System website.

The Company's 2019 and 2018 employee remuneration amounts were $25,725 thousand and $3,393 thousand, respectively, and directors' and supervisors' remuneration amounts were $5,145 thousand and $679 thousand, respectively, and there was no difference from the actual distribution situation. Information about the remuneration of employees and directors' and supervisors' decided by the company's board of directors can be accessed from the Market Observation Post System website.

(17) Other gain and losses, net

	For the year ended December 31, 2020	For the year ended December 31, 2019
Foreign exchange losses	$ (42,135)	(23,975)
Trademark rights revenue	7,500	7,500
Dividend income	6,176	6,311
Gain on financial assets at fair value though profit or loss	580	1,288
Other	7,158	2,909
	$ (20,721)	**(5,967)**

(18) Financial instruments

A. Credit risk

(a) Exposure and concentration of credit risk

The carrying amount of financial assets represents the maximum amount exposed to credit risk. The customers of the Company are mainly concentrated in the downstream heat pipe module factory of the computer industry. As of the end of December 31, 2020 and 2019, the total amount of notes and trade receivables deriving from the top five customers of the Company's operating income was $266,711 thousand and $208,466 thousand. They accounted for 88% and 74% of the net amount of notes and trade receivables, respectively. To reduce the concentration of credit risk, the Company continuously evaluates the credit status of its customers and collectability of notes and trade receivables, and provides an allowance for doubtful accounts.

(b) Receivables

For credit risk exposure of notes and trade receivables, please refer to note 6(3).

Other financial assets at amortized cost includes other receivables - related parties and time deposits (recorded in other current assets).

All of these financial assets are considered to have low risk, and thus, the impairment provision recognized during the period was limited to 12 months expected losses. Regarding how the financial instruments are considered to have low credit risk, please refer to note 4(6). No loss allowances were recognized under financial assets at amortized cost.

B. Liquidity risk

Except for the accrued expenses under other current liabilities, the contractual maturities of financial liabilities are as follows:

	Carrying amount	Contractual cash flows	1 years	2-5 years
December 31, 2020				
Non derivative financial liabilities				
Bank loan	$ 50,000	50,440	50,440	-
Notes and trade payables (including related parties)	62,230	62,230	62,230	-
Lease liabilities (including other current liabilities)	8,905	9,028	4,514	4,514
	$ 121,135	**121,698**	**117,184**	**4,514**
December 31, 2019				
Non derivative financial liabilities				
Bank loan	$ 10	10	10	-
Notes and trade payables (including related parties)	27,770	27,770	27,770	-
Lease liabilities (including other current liabilities)	13,262	13,542	4,514	9,028
	$ 41,042	**41,322**	**32,294**	**9,028**

The Company does not expect the cash flows included in the maturity analysis to occur significantly earlier or at significantly different amounts.

C. Market risk

(a) Exposure to foreign currency risk

The Company's significant exposure to foreign currency risk was as follows:

	December 31, 2020			December 31, 2019		
	Foreign currency	Exchange rate	TWD	Foreign currency	Exchange rate	TWD
Financial assets						
Monetary items						
USD	$ 30,418	28.48	866,304	25,314	29.98	758,922
Non-monetary items						
USD	60,071	28.48	1,710,004	44,372	29.98	1,330,281
Financial liabilities						
Monetary items						
USD	2,184	28.48	62,193	925	29.98	27,734

(b) Sensitivity analysis

Exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, notes and trade receivables, and notes and trade payables (including related parties) that are denominated in foreign currency. A strengthening (weakening) of 5% of the NTD against the USD as at December 31, 2020 and 2019 would have increased (decreased) the net profit before tax by $40,206 thousand and $36,559 thousand. The analysis is performed on the same basis for prior year.

(c) Foreign exchange gain and loss on monetary items

Since the Company has many kinds of functional currency, the information on foreign exchange gain (loss) on monetary items is disclosed by total amount. For years 2020 and 2019, foreign exchange loss (including realized and unrealized portions) amounted to$42,135 thousand and $23,975 thousand, respectively.

(d) Other price risk

For the years ended December 31, 2020 and 2019, the sensitivity analyses for the changes in the securities price at the reporting date were performed using the same basis for the profit and loss as illustrated below:

Prices of securities at the reporting date	For the year ended December 31, 2020 Other comprehensive income after tax	For the year ended December 31, 2020 Net income	For the year ended December 31, 2019 Other comprehensive income after tax	For the year ended December 31, 2019 Net income
Increasing 10% (listed and emarging stocks) and 1% (mutual funds)	$ 7,624	1,086	5,075	1,535
Decreasing 10% (listed and emarging stocks) and 1% (mutual funds)	$ (7,624)	(1,086)	(5,075)	(1,535)

D. Interest rate analysis

The Company's assessment did not have a significant loan rate risk.

E. Fair value of financial instruments

(a) Fair value hierarchy

The fair value of financial assets and liabilities at fair value through profit or loss, financial assets at fair value through other comprehensive income (available for-sale financial assets) is measured on a recurring basis. The carrying amount and fair value of the Company's financial assets and liabilities, including the information on fair value hierarchy were as follows; however, except as described in the following paragraphs, for financial instruments not measured at fair value whose carrying amount is reasonably close to the fair value, lease liabilities disclosure of fair value information is not required:

	December 31, 2020				
	Book Value	Fair Value Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss					
Beneficiary Certificates	$ 108,682	108,682	-	-	108,682
Financial assets at fair value through other comprehensive income

(b) Valuation techniques for financial instruments not measured at fair value

i. If financial instruments measured at fair value through profit or loss, and equity instruments with quoted prices in active markets are available, the market price is established as the fair value.

ii. If quoted prices in active markets are not available, the market comparable company method are used to estimate fair value, that is assessed by the pee stock price ratio.

(c) Transfer between Level 1 and Level 3

The equity shares of the Company in Powerchip Technology Corporation were accounted for as fair value through other comprehensive income due to having without any public quotation. Also, significant unobservable inputs were used to measure their fair value, therefore, they were classified as Level 3 of the fair value hierarchy. However, a resolution was approved during the board meeting of Powerchip Technology Corporation held in September 2020 for a capital reduction, wherein the share price to be refunded will be converted into shares of Powerchip Semiconductor Manufacturing Corporation, whose shares will be listed at emerging stock market on December 9, 2020. If there is a quotation in the active market, the fair value measurement will be transferred from the Level 3 to the Level 1 on December 31, 2020.

(d) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Company's financial instruments that use Level 3 inputs to measure fair value are " financial assets measured at fair value through other comprehensive - equity investments".

The equity investments without an active market that use Level 3 inputs to measure fair value due to the use of significant unobservable inputs. The significant unobservable inputs of the equity investments are independent, therefore, there is no correlation.

Quantified information of significant unobservable inputs was as follows:

Item	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets at fair value through other comprehensive - equity investments without an active market	Market Method (comparable to the price and net value ratio of the listed (cabinet) company's peers)	• Price and net value ratio multiplier (As of 31 December 2020 and 2019 were 1.40~1.92 and 1.37~1.76) • Lack of market liquidity discount (As of 31 December 2020 and 2019 were 20% and 20~30%)	• The higher the price and net value ratio multiplier, the higher the fair value • The higher the lack of market liquidity discount, the lower the fair value

(e) Reconciliation of level 3 fair values

		For the year ended December 31, 2020	For the year ended December 31, 2019
Financial assets measured at fair value through other comprehensive income - Equity instruments without an active market

Transfer from level 3		(2,905)	-
Balance at December 31	$	**5,358**	**30,395**

(19) Financial risk management

A. Overview

The Company have exposures to the following risks from its financial instruments:

(a) credit risk

(b) liquidity risk

(c) market risk

This note presents information about Company’ s exposure to each of the above risks, the Company’ s objectives, policies and processes for measuring and managing risk. Further quantitative disclosures are included throughout these financial statements.

B. Structure of risk management

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework.

The Company’ s risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company’s activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

C. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company’s bank deposits, trade receivables and guarantees.

(a) Company’s bank deposits

The exposure to credit risk for the bank deposits, and other financial instruments is measured and monitored by the Company’s finance department. The Company only deals with banks, corporate organizations, and financial institutions with good credit rating. The Company does not expect any counterparty above fails to meet its obligations hence there is no significant credit risk arising from these counterparties.

(b) Trade receivables

The Company continuously evaluate the financial status. Please refer to Note 6(18) of the financial report.

(c) Guarantees

The Company’ s policy is to provide financial guarantees only to wholly owned subsidiaries. For details of the guarantee provided by the Company of December 31, 2020 and 2019, please refer to Note 7 and 13.

D. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company’ s approach to managing liquidity is to ensure, as far as possible, that it always has sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company’ s reputation.

Liquidity risk of the Company is monitored through its corporate financial department which tracks the development of the actual cash flow position for the Company and uses input from a number of sources in order to forecast the overall liquidity position both on a short and long term basis. Corporate financial invest surplus cash in money market deposits and short term investments with appropriate maturities to ensure sufficient liquidity is available to meet liabilities when due. The Company manages sufficient cash and cash equivalents so as to cope with its operations and mitigate the effects of fluctuations in cash flows.

E. Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, will affect the Company’ s income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

The Company in order to manage market risk. All such transactions are carried out within the guidelines set by the Board of Directors and are subject to the monitor from internal audit office.

(a) Currency risk

The Company is exposed to currency risk on sales, purchases, and borrowings that are denominated in a currency other than the respective functional currencies of the Company's entities. The currencies used in these transactions are the USD and CNY.

In respect of other monetary assets and liabilities denominated in foreign currencies, the Company ensures that its net exposure is kept to an acceptable level by buying foreign exchange option or forward exchange contracts when necessary to address short-term imbalances.

The Company is not hedges its investment in foreign subsidiaries.

(b) Interest rate risk

Bank deposits and short-term loans of the Company are financial assets and liabilities subject to floating interest rates, so changes in market interest rates will cause the effective interest rate of bank deposits and short-term borrowings to change accordingly, and cause a wave of future cash flows move.

(c) Other market price risk

The primary goal of the Company' s investment strategy is to maximize investment returns. In accordance with this strategy, certain investments are designated as at fair value through profit or loss because their performance is actively monitored and they are managed on a fair value basis.

(20) Capital management

The board' s policy is to maintain a strong capital base so as to maintain investor, creditor, and market confidence and to sustain future development of the business. Capital consists of share capital, capital surplus, retained earnings, and other equity interest. The board of directors managing its capital is to safeguard the capacity to continue as a going concern, to provide a return on shareholders, and to maintain an optimal capital structure to reduce the cost of capital.

The debt-to-capital ratio at the reporting date is as follows:

(2) On September 15, 2009, the Group entered into an agreement with an agent, Taiwan Mother Cosmo Co., Ltd. (TMC), for the manufacturing and sales of fibre-alcohol in the People's Republic of China in order to obtain fibre-alcohol mass production technology and related advisory services. However, the TMC failed to comply with the agreement, resulting in the Group to file a lawsuit against the agent, including its chairman and vice chairman, to the Taipei District Court. The Company also provided the amount of $16,800 thousand to the Taipei District Court as security after an execution of a ruling on the abovementioned lawsuit had been carried out. On the other hand, TMC was dissatisfied with the decision made by the Taipei District Court, and therefore, filed an appeal to the Taiwan High Court. On December 7, 2016, the Taiwan High Court demanded TMC to pay the amount $70,308 thousand to the Company, but dismissing the allegation against its chairman and vice chairman. TMC disagreed with the court's decision, hence, filed an appeal against it. However, its appeal was denied on October 11, 2018. On January 31, 2019, TMC appealed to the Supreme Court. After the final judgment, the Supreme Court ruled and denied the appeal.

(3) In 2010, the Company entered into an agreement with Unimax Investment Services Ltd. (Unimax) for the purchase of spotlights, wherein Davinci Industrial Inc. (Davinci) was responsible for the manufacturing and sales of the said product. However, there were defects found in the products, resulting in the Company to return them to Unimax for repair. Unimax, on the other hand, refused to comply with the Company's request, which prompted the Company to terminate their agreement and proceeded in filing a lawsuit against Unimax to the Taipei District Court. Furthermore, since Davinci was also involved the case, the Company filed another lawsuit against Davinci to the Taipei District Court on December 12, 2012, demanding for a compensation claim of $41,055 thousand. In addition, the Company provided the amount $7,000 thousand as security after an execution on the ruling on the abovementioned lawsuit against Davinci had been carried out. This case is still in progress as of the issuance of this report.
